# Who will help me help her?

**ALEXIS\* WAS BORN WITH SEVERE CARDIAC DEFECTS.** By six weeks she had developed signs of respiratory distress, congestive heart failure, poor oral intake and failure to thrive. The family was told that there was nothing that could be done, and that Alexis would soon die. Hospice care, high doses of morphine and cardiac medications were started.

To Alexis' parents it seemed as if all their options had been exhausted. Until Alexis' mother called Best Doctors.

The Best Doctors team connected Alexis and her treating physician with one of the world's top Paediatric Cardiac Surgeons, chosen from the Best Doctors global network of 50,000 specialists.

The Best Doctors expert offered a pioneering surgery he had developed that would not only save Alexis' life, but also offer her full life expectancy. Alexis' mother wept with relief when she heard.

A few weeks later, the Best Doctors expert successfully completed the complex surgery. Alexis' heart now works perfectly and she will be able to live a normal life.

"Our baby is alive, her little heart is fixed. Alexis is playing with her brother, laughing and has no more pain. Our family is overwhelmed with joy. Thank you, thank you Best Doctors."
