

A man and a child are skiing down a snowy slope. The man is in the foreground, wearing a dark jacket and a beanie, leaning forward with his skis. The child is behind him, wearing a blue and black jacket, also leaning forward. The background shows a sunset or sunrise over a forested area, with a warm orange and yellow glow in the sky. The overall scene is peaceful and active.

This is David's story. It begins with the flu; David hopes his kids won't get it. But David's flu symptoms are followed by chest pain, vomiting and severe headache—this cannot be the flu, it's far more serious. For David and his family, normal life is over. They put their lives on hold as the symptoms pile up: David's speech becomes impaired, then his vision, finally he cannot walk. For each symptom, there is another test, but no clear diagnosis emerges. David needs clarity. Best Doctors provides it with a confirmed diagnosis, information and a plan for action. David gets his life back. David's family gets David back. Because of Best Doctors, David's story is a life story.
