

# When should you call Best Doctors?

YOU CAN CALL BEST DOCTORS® if you or your eligible dependents have been diagnosed with a serious illness, or if a serious illness is suspected. Your medical condition will be reviewed thoroughly, and your diagnosis and treatment plans verified. You do not have to leave home or incur any additional costs.

You may also call Best Doctors if you need help navigating the healthcare

system or have questions about your healthcare. Best Doctors 360™ service is a resource available to you whether you have a serious illness or not. With Best Doctors 360, you and your spouse and dependent children have access to resources, ongoing one-on-one support, customized health coaching and a wide range of health related information.

In the past twenty years, Best Doctors has reviewed tens of thousands of cases. In 22% of these cases, the diagnosis has been changed; in 61% of cases, treatment plans have been modified; and, in 67% of cases, Best Doctors members avoided invasive procedures.

For more information, please call us at **1 877 419-BEST (2378)**, view our interactive presentation at [bestdoctorscanada.com/overview](http://bestdoctorscanada.com/overview) or visit us online at [bestdoctorscanada.com](http://bestdoctorscanada.com).

## You should call Best Doctors if:

- you are looking for a second opinion
- you need help navigating the healthcare system
- you are looking for a family doctor
- you are looking for a specialist
- you need to travel outside of Canada to see a specialist
- you have questions about your treatment
- you are unsure about your treatment
- you have questions about a test you've had done
- you have questions about your healthcare
- you need help managing your symptoms
- you need help communicating with your doctor
- you have a serious medical condition
- you think you may have or have been diagnosed with conditions such as:

AIDS	Stroke
Blindness	Alzheimer's Disease
Cancer	Benign Brain Tumour
Coma	Cardiovascular Disease
Kidney Failure	Deafness
Major Organ Transplant	Loss of Speech
Motor Neuron Disease (ALS)	Major Trauma
Paralysis	Multiple Sclerosis
Severe Burns	Parkinson's Disease

Almost all illnesses and conditions are covered with the exception of mental, nervous and chronic pain conditions such as Fibromyalgia.
